

Dyslexia

Dyslexia is about information processing. It is a neurological difference that primarily affects reading and writing skills. Characteristic features involves difficulties with recognising speech sounds and understanding their relation to letters and words, spelling, and visual-verbal response.

Everyone's experience of dyslexia will be individual to them.

Dyslexia is a combination of abilities as well as difficulties.

Characteristics

Slow reading and writing

Problems with spelling

Omitting words or letters when writing or reading

Writing letters, the wrong way

Difficulty with maths

Taking longer to complete tasks involving reading or writing

Confusion with visually similar words

Dyslexia is an invisible disability

Hereditary

Parents with dyslexia are highly likely to have children with dyslexia.

Dyslexia is not just about getting letters or numbers mixed up or out of order.

1 IN 10 PEOPLE

of the world's population is estimated to have dyslexia.

Choosing to wear the Sunflower indicates that you, or someone with you, has a non-visible disability and may need additional support or simply a little more time.
